

2008-2009 MARCHING DRUMS CATALOG

The Mapex Quantum HT snare drum combines the traditional design and function of a conventional marching snare drum with the ability to support high tension tuning.

The Quantum XT snare drum will accommodate all head types and remains full, open, and sensitive at all levels of tension. Wood reinforcing rings on the bottom bearing edge ensure structural integrity and roundness of shell when using woven fiber bottom snare heads.

New to the series is the Agility snare drum, a shorter, lighter version of the XT ideal for indoor drum lines and other marching ensembles that demand high tension tuning with reduced weight or enhanced articulation.

See pages 46-49 for full selection of carriers, stands, and accessories.

SPECIAL FEATURE

An aluminum bearing edge on the Quantum HT models provides strength and stability to the shell while offering a precise, consistent bearing edge that stands up to the highest tensions.

The Mapex Quantum toms and bass drums represent significant advancements in the evolution of marching drums. Tom shells feature interior plies of Walnut and a progressive cut that produces a full, dark sound that doesn't become choked at high tensions.

Bass drums feature progressive air vent placement for a more consistent sound and feel throughout the bass ensemble and are outfitted with chambered aluminum hoops that provide strength and stability while eliminating the need for additional rim protection.

Lightweight, aluminum tube lugs minimize shell contact while ensuring the best possible alignment of tension rods to keep tuning stress off the shell.

Marching Toms

QCT680234
SEXTET

SPECIAL FEATURES

Tom shells have two interior plies of Walnut for superior warmth and projection as well as Walnut reinforcing rings for stability.

The Mapex Quantum series offers three unique straight cut shot drum sizes to suit different configurations.

The **QCT68023** quints employ the 6"x 6" to match the brighter overall timbre, while the **QCT60234** set utilizes the 6"x 8" to match the darker tone characteristic of the larger shells. Sextets with two 6" toms are equipped with one each 6"x 6" and 6"x 8". The **QCT680234** sextet uses the 6"x 6" and 8"x 6" for maximum pitch differentiation.

See pages 46-49 for full selection of carriers, stands, and accessories.

BASS DRUMS

The Mapex Qualifier marching drum series offers traditional design and reliable function.

The Qualifier Deluxe model snare drum supports high-tension with its aluminum bearing edge, cast hoops, full-length lugs and Pro snare strainer, while the standard models offer reduced weight and simplified function.

Qualifier toms and bass drums offer high-strength, cast aluminum lugs for reliable tuning while keeping the weight manageable for younger players.

See pages 46–49 for full selection of carriers, stands, and accessories.

Mapex offers three types of carriers as well as a complete series of stands, cases and accessories to meet the needs of any ensemble.

Aluminum Vest Carriers

Back Rails

XL Specialties® OmniRails™ are available for both Quad/Quint and Quint/Sextet tom configurations for optimized ergonomic placement of shot drums.

The OmniRail™ sliding quick-release attachment mechanism makes it possible to position shot drums consistently at the desired height relative to other drums, and helps to facilitate fast head changes with minimal interruption to the player.

See page 44 for tom configurations and corresponding mounting systems.

Q-BALL™ SNARE

XQBQD2
Q-BALL™ TOM

XQBBB3
Q-BALL™ BASS

The Mapex Q-Ball™ vest carrier, by XL Specialties®, features a revolutionary new adjustment system that allows multiple axis control of shoulder pieces to fit all sizes and shapes comfortably. The backs of these shoulder pieces distribute weight evenly, while reducing contact with pressure points on the spine and shoulder blades. Q-ball™ carriers are finished in black, for a sleek look complementary to most uniform colors.

SPECIAL FEATURE

The dual swiveling ball and socket clamps at each shoulder connection on the Q-Ball™ carrier by XL Specialties® provide multi-axis adjustment for virtually infinite positioning to conform to all body shapes and sizes.

Q-Ball™ is a trademark of Jupiter Band Instruments, Inc.
